Walkable matte laminate for indoor foot traffic.

SMOOTH SURFACES

For sealed concrete, tile, wood, counters and more.

Surface, Application & Care

PRODUCT

Material	Anti-slip floor vinyl	Finish	Anti-slip laminate
Use	Short-term	Print Sides	Single-sided
Environment	Indoor (and protected outdoor)	Options	Custom size, contour cut

SURFACE REQUIREMENTS

- For smooth, sealed indoor surfaces — sealed concrete, tile, hardwood, laminate and counters
- Not intended for rough exterior surfaces; use Boot Prints for concrete, asphalt and brick
- Clean and dry the surface and let it reach room temperature before applying

APPLICATION

- Peel and place; squeegee or roll from the center outward to push out air, then press the edges firmly
- Removable for short-term use without aggressive residue on sealed surfaces — test an inconspicuous area first

CARE

- Clean with a damp mop and mild cleaner
- Avoid abrasive pads and harsh solvents that dull the anti-slip laminate
