

Vehicle Magnet

30 mil Flexible Magnetic Sheet

High-Gloss Finish · Indoor & Outdoor

COMMON USES

Vehicle Magnets, Business & Fridge Magnets, Promotions

MATERIAL

30 mil Flexible Magnetic

CUSTOM SIZES

2"x3" up to 24"x96"

OPTIONS

Contour Cut, Rounded Corners

FINISH

High-Gloss

PRINT SIDES

Single-Sided

REMOVABLE & REUSABLE

Lifts off clean with no adhesive and no residue; reposition any time.

STRONG FLAT-PANEL HOLD

30 mil magnetic sheet grips clean, flat steel surfaces securely.

WEATHERABLE GLOSS FACE

UV-printed high-gloss surface built for indoor or outdoor display.

Application, Handling & Care

Flexible magnetic sheet holds by magnetic attraction alone — there is no adhesive. Hold strength depends on the surface it is placed on, so the guidance below matters for both performance and protecting your vehicle's finish.

PRODUCT

Material	30 mil flexible magnetic sheet	Finish	High-gloss UV print
Print Sides	Single-sided	Environment	Indoor & Outdoor
Custom Sizes	2"x3" up to 24"x96"	Options	Contour cut, rounded corners

SURFACE REQUIREMENTS

- Adheres only to clean, smooth, flat ferrous (steel) surfaces
- Will not hold on aluminum, fiberglass, plastic or carbon-fiber panels — many modern hoods, doors and trunk lids are aluminum or composite; test placement first
- Choose a flat panel larger than the magnet; it will not hold reliably across body seams, deep curves or trim molding

APPLICATION

- Wash and dry both the vehicle panel and the back of the magnet before the first application
- Apply only to a clean, dry, wax-free, dent-free surface
- Press into place from the center outward to seat the full magnet flat against the panel

CARE & MAINTENANCE

- Remove the magnet at least once a week; clean both the magnet and the panel, then dry fully before reattaching
- Removing periodically prevents trapped moisture and dirt from marking or etching the paint underneath
- Do not run the vehicle through automatic car washes — remove the magnet first
- Remove before sustained highway-speed driving; wind lift at speed can dislodge a magnet

STORAGE

- Store flat, or rolled with the printed face outward — never folded; a crease is permanent
- Keep away from heat sources and prolonged direct sun when not in use

Important: magnetic hold depends on your vehicle's panel material, curvature and surface condition, all of which vary by vehicle. Fast Prints USA recommends testing fit and hold on your specific vehicle before extended use. This sheet describes material handling and care; it does not state a rated pull strength or durability period.
